

Service Offering

With our mission to make DAOs legal and build legally sound bridges between DeFi and TradFi, the SwissAssetDAO offers a suite of services to DAOs and RWA projects.

Every DAO and every RWA project is unique. We create for you a tailor-made proposal to support you on your specific journey. We have a team of dedicated domain specialists from the DAO ecosystem to accompany you and deliver agreed services.

The decentralized nature of the SwissAssetDAO and the full legal clarity as an Association under the laws of Switzerland, gives us the skillset and first-hand experience no other domain advisor can offer.
